Common Conditions for Admission to Kindred Hospitals

Kindred Hospitals provide specialized long-term acute care and rehabilitation for medically complex patients. With physician-led, interdisciplinary care and disease-specific certifications from The Joint Commission, we provide seriously ill or injured patients with the high-quality acute care they need, for the time they need it.

Learn more about the conditions that often lead to a transfer to Kindred Hospital.

Complex respiratory conditions that may require ventilator weaning, including but not limited to:

- · Acute respiratory distress syndrome
- · Acute respiratory failure
- · Airway burns
- · Aspiration pneumonia
- Chronic ventilation with increased reliance on support

- · Complicated pulmonary infections
- · COPD/emphysema
- COVID
- · Failed weaning attempts at acute care setting
- · Interstitial lung disease/pulmonary fibrosis
- · Post-COVID conditions

Complex wound/skin conditions, including but not limited to:

- · Abscess with drainage
- Amputation wounds
- · Burns or skin condition 15% or more of BSA
- Decubitus ulcers
- · Fournier's gangrene
- Multiple wounds requiring complex wound care that precludes patient from moving to lower level of care
- · Necrotic wounds requiring sharp debridement
- Necrotizing fasciitis
- · Neuropathic and diabetic ulcers
- Post-operative wound complications

Infectious diseases, including but not limited to:

- Abscess
- AIDS-related infections
- Bacteremia
- Cellulitis
- CNS infection
- Complex pneumonia
- Empyema
 - Endocarditis
 - Osteomyelitis
 - Pyelonephritis
 - Sepsis

Medically complex conditions, including but not limited to:

- Post-operative complications
- Cerebral vascular accident
- Unstable diabetes mellitus
- Congestive heart failure
- AIDS/HIV complications
- Metabolic disorders
- Gastrointestinal dysfunction
- Acute kidney failure
- Cancer requiring preor post-treatment optimization
 - Malnutrition requiring TPN, PPN, NG/OG or DHT
